

# HELIUS PORTAL

Learning Management System – Easily Manage Online Training  
for Employees, Partners and Customers

## Applications

- Employee Training
- Channel Partner Training label,
- Sales Training
- HR Communications
- Product Demonstrations
- Compliance Training
- Dynamic Marketing Collateral
- Customer Surveys
- Change Management
- And Much More

Helius Portal provides you with your own private label, secure website that gives you the power to organize, manage, and distribute your online training and presentations - with none of the IT hassles!

This turnkey, web-based LMS solution takes the headache out of managing your online training and lets you focus on what moves your business forward - getting information into the right hands at the right time.

# Helius Portal Pricing Models

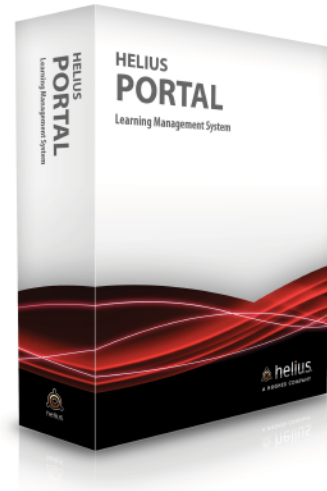

Helius Portal is available in two different pricing models.

The **Data Transfer model** provides unlimited users, with the ability to purchase additional per-month data transfer separately.

Buyers of this model typically have over 500 users, but only expect a small percentage of those users to access the portal each month, so their data transfer needs are low.

The **Per User model** provides unlimited data transfer with the ability to purchase additional users separately.

Buyers of this model typically have less than 500 users but expect a high percentage of those users to access the portal each month, so their data transfer needs are high.

## Base Product Elements

	Per User Model	Data Transfer Model
<b>Users</b>	500	Unlimited

<b>Create Surveys</b>	Unlimited	Unlimited
<b>Custom URL</b>	Yes	Yes
<b>Deployment Time</b>	Seconds	Seconds

## Additional Product Options

- Web Services API - Through a programmatic XML interface, the administrator can bulk export raw data from the Portal into other systems.
- Single Sign-on API – Creates a seamless user experience by instantly providing secure pass-through access from your corporate website to your Helius Portal, using your company's existing user accounts.
- Private Branding – Removes all Helius branding from the portal, leaving a clean environment for your users.
- Co-Branding – Removes all Helius branding from the portal environment and adds a "Powered-by" logo with your company name on every page.
- Additional Users - Additional seats can be added to the system in increments of 250 as your needs grow.
- Additional Data Transfer – Additional data transfer can be added to the system in increments of 3GB as your needs grow.

## Helius Portal Features and Benefits

- **Solution Flexibility** – As always, Helius Portal comes with no setup or termination fees, and you can cancel at anytime without penalty
- **High Security** – Your private-branded secure LMS portal is completely hosted by Helius
- **Fast and Scalable Implementation** – Go live in seconds
- **Customizable Interface** – Dynamically change the look and feel of the portal to fit your corporate identity or website
- **Custom URL** – Set up your branded Helius Portal to work as part of your own domain name so your customers and employees feel like they are always on your website
- **Flexible Content Assignment** – Choose exactly who has access to specific content, whether by user, group, or everyone.
- **Anywhere, Anytime Access** – Allow users to access training 24/7 or at specific times
- **Custom User Permissions** – Set user permissions from standard or custom roles
- **Individual Learning Paths** – Create custom learning paths for users, depending on needs
- **Quiz and Survey Authoring** – Easily create quizzes and surveys for evaluation and reporting
- **SCORM Content** – Use any SCORM-compliant authoring tool such as Helius Presenter
- **Non-SCORM Content** – Use any type of file including Word, Excel, PPT, PDF, and more
- **Managerial Reporting** – Give managers access to reporting that is restricted to managed users
- **Powerful Custom Reports** – Real-time reports allow you to monitor & track user progress & performance as well as completion rates
- **Detailed Student Transcripts** – Provide student transcripts with comprehensive learning history
- **System Notifications** – Automatically notify users when new content is available
- **Single Sign-on** – Take advantage of the optional single sign-on module for Intranet integration
- **Free Support** – Access our world-class support team via telephone or email at no cost
