

# HELIUS PRESENTER

Delivering all the power of Flash without the complexity.

## Applications

- Employee Training
- Channel Partner Training label,
- Sales Training
- HR Communications
- Product Demonstrations
- Compliance Training
- Dynamic Marketing Collateral
- Customer Surveys
- Change Management
- And Much More

Helius Presenter is a PowerPoint© plug-in that automatically converts your PowerPoint XP, 2002, 2003 and 2007 presentations into a highly compressed Internet presentation in the Macromedia Flash™ format.

With Helius Presenter, anyone can easily create rich-media Flash presentations and interactive online training.

**Helius Presenter** comes in two flavors – Lite and Professional. Both enhance Microsoft PowerPoint by allowing you to record a voiceover or narrative for your PowerPoint presentation. The narrative is synchronized with the presentation slides and animations that can be organized into sections.

Your enhanced presentation is then converted to an interactive Flash presentation that maintains the fidelity of advanced PowerPoint® features including vector graphics, hyperlinks, animations, etc. You may then distribute your presentation efficiently via the web, an intranet, or CD-ROM. Presenter Professional users also have the ability to insert interactive elements such as quizzes, surveys, and Flash movies, and publish to a SCORM-compliant learning management system such as Helius Portal. For a complete feature comparison, see below:
